Volume XXIII, THE SCIENCE TEACHER

Index—February through December 1956

Author's Index

Albrecht, Joseph M. *Techniques in Microscope Slide Preparation.* April: 142.

Angell, George W., Jr. *The Philosophy of Test Construction in Science.* May: 175.

Babyock, Nicholas M. *Magnetic Lines of Force.* May: 205.

Baker, Carl G. *Chromatography and Paper Electrophoresis.* May: 192.

Barnett, Gladys R. and Benjamin J. Novak. *Scientists and Musicians.* September: 229.

Bayles, Ernest E. *Is Science Teaching Scientific?* February: 11.

Bennett, Thomas P. *Cleaning and Purifying Mercury.* March: 109.

Bennett, Thomas P. *Force Feeding Snakes.* November: 361.

Brem, Peter. *It's Easier Than You Think!* April: 153.

Brown, Kenneth E. *National Enrollments in High School Science.* March: 89.

Brown, Stanley B. *The 1956 Science Achievement Awards Program in Region VII.* November: 332.

Bryan, W. Ray. *The Induction of Cancer by a Virus.* March: 97.

Burdick, Allan B. *Thrilling New Advances in Visual Aids.* September: 237.

Burton, M. S. *Metallurgical Engineering as a Career.* March: 83.

Caldwell, Loren T. *Earth Science Principles in the Secondary School.* April: 133.

Carr, Roman R. *An Ampule Reagent Rack for Semi-Micro Chemistry.* November: 357.

Cassavant, Joan. *Camera Craft: Make Your Own Demonstration Model.* October: 290.

Chambers, Randall M., Sherman Ross, and Victor H. Denenberg. *Development of High Level Science Talent.* October: 279.

Coutant, Madeleine F. *Evaluation Sheet for a Student Science Project.* May: 206.

Cressman, Harry E. *Determining the Frequency of a Vibrating String.* March: 107.

Denenberg, Victor H., Sherman Ross, and Randall M. Chambers. *Development of High Level Science Talent.* October: 279.

Denslow, Cornelius. *What Happens If—?* December: 385.

Dollahon, Virgil C., Arthur Houston, Flora Kahme, and Herbert McMillen. *A Keyhole Look at Science Fairs.* November: 328.

Doty, Robert G. *A Different Quiz Procedure.* April: 153.

Dressel, Paul L. *The Challenge.* February: 23.

Dubins, M. Ira. *Pressure Variation and the Radiosonde.* December: 420.

DuBridge, Lee A. *Science—The Endless Adventure.* October: 273.

Dunnington, F. G. *Nuclear Energy.* April: 129.

Easter, Ronald R. *Today's Psychology Can Help Teachers Teach.* May: 179.

Eiseman, Frederick B., Jr. *A Saturating Core Reactor for the Physics Laboratory.* October: 282.

Eiseman, Frederick B., Jr. *Teaching Radio in High School Physics.* December: 388.

Fischer, Richard B. *How to Evaluate a Field Trip.* November: 330.

Fitzgerald, Dorothea. *Transplantation of Tumor Tissue.* April: 143.

Frazier, Lynn E. *Throw the Switch!* October: 293.

Gantert, Robert L. *Pets, Parents, and Children.* May: 188.

Goering, Marjory and Ray A. Woodriff. *A New Method of Presenting the Gas Laws.* December: 392.

Greenfield, Robert E. *Demonstration of Enzyme Activity.* May: 190.

Greenlee, Julian. *Effective Learning Through Science Investigations.* February: 15.

Haney, Melva M. *Science Crossword Puzzle.* May: 207.

Hollenbeck, Irene. *A Problem-Solving Approach in Biology.* February: 17.

Houston, Arthur, Virgil C. Dollahon, Flora Kahme, and Herbert McMillen. *A Keyhole Look at Science Fairs.* November: 328.

Hudson, Douglas and Robert McCafferty. *A Self-Starting Siphon.* March: 109.

Ihde, Aaron J. *The Development of Scientific Laboratories.* November: 325.

Kahme, Flora, Virgil C. Dollahon, Arthur Houston, and Herbert McMillen. *A Keyhole Look at Science Fairs.* November: 328.

Keeslar, Oreon. *Do Their Scientific Methods Show?* February: 21.

Keeslar, Oreon. *The Science Teacher and Problem Solving.* February: 13.

Lawrence, James G. *Insects in the Classroom.* October: 286.

Leighton, Joseph. *Tissue Culture.* April: 139.

Light, Israel. *Incorporating Cancer Information in the Secondary School Science Program.* March: 93.

Lippincott, William T. and Richard M. Sutton. *College Teachers Look at High School Science.* May: 184.

Long, Robert H. *An Apparatus for Introducing the Principle of Polarized Light.* September: 243.
Lowe, Janet M. *Polio Education: A Live Study for the Classroom.* September: 239.
Lynde, Carleton J. *High School Physics in Popular Dress.* November: 353.
MacCardle, Ross C. *The Use of Prepared Microscope Slides in the Teaching of Science.* March: 95.
Maul, Ray C. *Is the Science Teacher Shortage a Curriculum Factor?* May: 181.
McCafferty, Robert and Douglas Hudson. *A Self-Starting Siphon.* March: 109.
McMillen, Herbert, Virgil C. Dollahon, Arthur Houston, and Flora Kahme. *A Keyhole Look at Science Fairs.* November: 328.
Meadows, Edna L. *Genetics a la Chinese Checkers.* December: 422.
Munch, Theodore W. *Display Areas and the Group Technique.* November: 334.
Novak, Benjamin J. and Gladys R. Barnett. *Scientists and Musicians.* September: 229.
Poehler, Paul F., Jr. *Adventures in Science.* November: 333.
Porter, David D. *Laboratory Savings.* September: 243.
Powers, Glenn F. *Student Reaction to Laboratory Work in Physical Science.* May: 205.
Prehn, Richmond T. *Genetics and Skin Grafting.* May: 195.
Reid, James C. *Radioactivity and Isotopic Tracer Studies.* April: 137.
Riley, William R. *An Improved Phase Change Demonstration.* April: 155.
Ronan, C. A. *The Talley Tercentenary.* November: 355.
Rosen, Sidney. *A Century of High-School Science.* November: 321.
Ross, Sherman, Victor H. Denenberg, and Randall M. Chambers. *Development of High Level Science Talent.* October: 279.
Rutledge, James A. *An Introductory Bibliography on Problem Solving.* February: 25.
Schenberg, Samuel. *Criteria for Sponsored Teaching Aids in Science Education.* October: 277.
Schmatz, Robert R. *Winter Nature Study.* December: 387.
Sheek, Martha R. *The ABC's of Bacteriology.* December: 398.
Silber, Robert. *A Holiday Matching Test.* November: 359.
Smeltz, John R. *Retention of Learnings in High School Chemistry.* October: 285.
Smith, Keith. *Trends in Junior High General Science.* March: 86.
Smith, Malcolm. *Amateur Radio in Science Teaching.* May: 187.
Spencer, Donald. *Endocrinology and the Effects of Hormones.* May: 196.
Stollberg, Robert. *Problem Solving—The Precious Gem in Science Teaching.* September: 225.
Stotler, Donald W. *Trends and Issues in Junior High School Level Science.* September: 233.
Sutton, Richard M. and William T. Lippincott. *College Teachers Look at High School Science.* May: 184.
Thaw, Richard F. *Culture Slides by the Week.* September: 245.
Trieger, Seymour. *Making Photographic Prints in the Classroom.* April: 135.
Wallen, I. E. *The Science Teaching Improvement Program (AAAS).* December: 399.
Ward, Harold E. *Problem Solving in High School Physical Science.* February: 19.
Wendlandt, Wesley W. *A Simple Model for the Structure of the Atom.* December: 422.
Westmeyer, Paul. *Teaching Chemistry the Easy Way.* December: 397.
Wilson, Leland L. *Longitude, Time, and Date.* November: 357.
Woodriff, Ray A. and Marjory Goering. *A New Method of Presenting the Gas Laws.* December: 392.
Woolever, John D. *Animals in the Science Classroom.* December: 396.

Topical Index

Education of Science Teachers

High School Chemistry: Keeping the Course Up to Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.
Problem Solving in Science Teaching—A Symposium
Is Science Teaching Scientific? Ernest E. Bayles. February: 11.
The Science Teacher and Problem Solving. Oreon Keeslar. February: 13.
Effective Learning Through Science Investigations. Julian Greenlee. February: 15.
A Problem-Solving Approach in Biology. Irene Hollenbeck. February: 17.
Problem Solving in High School Physical Science. Harold E. Ward. February: 19.
Do Their Scientific Methods Show? Oreon Keeslar. February: 21.
The Challenge. Paul L. Dressel. February: 23.
An Introductory Bibliography on Problem Solving. James A. Rutledge. February: 25.
Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.
Science-Related Mathematics Exercises—A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.

Elementary School Science

Insects in the Classroom. James G. Lawrence. October: 286.
It's Easier Than You Think! Peter Brem. April: 153.
Magnetic Lines of Force. Nicholas M. Babyock. May: 205.
Making Photographic Prints in the Classroom. Seymour Trieger. April: 135.
Problem Solving — The Precious Gem in Science Teaching. Robert Stollberg. September: 225.
Throw the Switch! Lynn E. Frazier. October: 293.
What Happens If—? Cornelius Denslow. December: 385.
Winter Nature Study. Robert R. Schmatz. December: 387.

Experiments, Demonstrations, and Pupil Projects and Activities

Camera Craft: Make Your Own Demonstration Model. Joan Cassavant. October: 290.
Determining the Frequency of a Vibrating String. Harry E. Cressman. March: 107.
Genetics a la Chinese Checkers. Edna L. Meadows. December: 422.
High School Chemistry: Keeping the Course Up to Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.
Insects in the Classroom. James G. Lawrence. October: 286.
A Keyhole Look at Science Fairs. Virgil C. Dollahon, Arthur Houston, Flora Kahme, and Herbert McMillen. November: 328.
Laboratory Exercises for the Life Sciences—A Series of Experiments, Demonstrations, and New Ideas.
The Use of Prepared Microscope Slides in the Teaching of Science. Ross C. MacCardle. March: 95.
The Induction of Cancer by a Virus. W. Ray Bryan. March: 97.
Representative Sources for Supplies. March: 99.
Radioactivity and Isotopic Tracer Studies. James C. Reid. April: 137.
Tissue Culture. Joseph Leighton. April: 139.
Techniques in Microscope Slide Preparation. Joseph M. Albrecht. April: 142.
Transplantation of Tumor Tissue. Dorothea Fitzgerald. April: 143.
Demonstration of Enzyme Activity. Robert E. Greenfield. May: 190.
Chromatography and Paper Electrophoresis. Carl G. Baker. May: 192.
Genetics and Skin Grafting. Richmond T. Prehn. May: 195.
Endocrinology and the Effects of Hormones. Donald Spencer. May: 196.
Making Photographic Prints in the Classroom. Seymour Trieger. April: 135.
Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.
A Self-Starting Siphon. Robert McCafferty and Douglas Hudson. March: 109.
Throw the Switch! Lynn E. Frazier. October: 293.

FSA Activities

Administrative Committee. September: 253.
Booklet Services. February: 61.
Datelines and Deadlines. March: 105.
Encouraging Future Scientists: Keys to Careers. October: 300.
High School Chemistry: Keeping the Course Up To Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.
Programs. March: 105. May: 211. September: 253. November: 367.
Roster of Sponsors. February: 61. March: 105. May: 211. September: 253. October: 299. November: 367. December: 427.
Science Achievement Awards for Students. February: 61. May *(1956 Winners):* 198. September: Insert. October: 299. November: 367. December: 427.
The Science Achievement Awards Program in Region VII. Stanley B. Brown. November: 332.
Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.
Science-Related Mathematics Exercises — A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.
Science Teacher Recognition Awards. April: 145.
Student Chart-Making Contest. February: 61. April: 159.
Summer Activities for Teachers. February: 61. October: 299. December: 427.
Summer Conference for Wisconsin High School Chemistry Teachers. May: 211.
Tomorrow's Scientists. February: 61. April: 161. May: 211. October: 299. December: 427.

History, Philosophy, Goals, and Objectives

A Century of High-School Science. Sidney Rosen. November: 321.
The Challenge. (Problem Solving in Science Teaching—A Symposium). Paul L. Dressel. February: 23.
College Teachers Look at High School Science. Richard M. Sutton and William T. Lippincott. May: 184.
The Development of Scientific Laboratories. Aaron J. Ihde. November: 325.
Do Their Scientific Methods Show? (Problem Solving in Science Teaching—A Symposium). Oreon Keeslar. February: 21.

Effective Learning Through Science Investigations (Problem Solving in Science Teaching—A Symposium). Julian Greenlee. February: 15.
An Introductory Bibliography on Problem Solving (Problem Solving in Science Teaching—A Symposium). James A. Rutledge. February: 25.
Is Science Teaching Scientific? (Problem Solving in Science Teaching—A Symposium). Ernest E. Bayles. February: 11.
The Philosophy of Test Construction in Science. George W. Angell, Jr. May: 175.
A Problem-Solving Approach in Biology (Problem Solving in Science Teaching — A Symposium). Irene Hollenbeck. February: 17.
Problem Solving in High School Physical Science (Problem Solving in Science Teaching—A Symposium). Harold E. Ward. February: 19.
Problem Solving — The Precious Gem in Science Teaching. Robert Stollberg. September: 225.
The Science Teacher and Problem Solving (Problem Solving in Science Teaching — A Symposium). Oreon Keeslar. February: 13.
Today's Psychology Can Help Teachers Teach. Ronald R. Easter. May: 179.

Information for Science Teachers

The ABC's of Bacteriology. Martha R. Sheek. December: 398.
Adventures in Science. Paul F. Poehler, Jr. November: 333.
The Development of an Idea: Science Teacher Summer Research Assistantships. March: 90.
Fellowships for College Science Teachers. December: 419.
Fifty-Year Science Teacher Honored by Chemical Industry. May: 203.
The Halley Tercentenary. C. A. Ronan. November: 355.
Institutes, Conferences, and Fellowship Programs for Science Teachers. February: 27.
An Introductory Bibliography on Problem Solving (Problem Solving in Science Teaching—A Symposium). James A. Rutledge. February: 25.
Metallurgical Engineering as a Career. M. S. Burton. March: 83.
National Enrollments in High School Science. Kenneth E. Brown. March: 89.
Nuclear Energy. F. G. Dunnington. April: 129.
Obourn New U.S.O.E. Specialist for Science. February: 24.
A Program of Academic-Year Institutes for High School Science Teachers: A Report on National Science Foundation Grants. December: 418.
Report of the New York City Advisory Committee on Science Manpower. December: 394.
Science Education in the Centennial of the Organized Teaching Profession. September: 241.
Science Teacher Achievement Recognition (STAR) Program. February: 55. March: Insert. May: 203. September: 251. October: 297. November: 363. December: 425.
Science Teacher Recognition Awards. April: 145.
The Science Teaching Improvement Program (AAAS). I. E. Wallen. December: 399.
Science—The Endless Adventure. Lee A. DuBridge. October: 273.
Scientists and Musicians. Benjamin J. Novak and Gladys R. Barnett. September: 229.
Teacher of the Year. September: 240.
The 1956 Science Achievement Awards Program in Region VII. Stanley B. Brown. November: 332.

Instructional Suggestions, Methods, and Materials

Adventures in Science. Paul F. Poehler, Jr. November: 333.
Amateur Radio in Science Teaching. Malcolm Smith. May: 187.
An Ampule Reagent Rack for Semi-Micro Chemistry. Roman R. Carr. November: 357.
Animals in the Science Classroom. John D. Woolever. December: 396.
An Apparatus for Introducing the Principle of Polarized Light. Robert H. Long. September: 243.
Camera Craft: Make Your Own Demonstration Model. October: 290.
Chromatography and Paper Electrophoresis (Laboratory Exercises for the Life Sciences). Carl G. Baker. May: 192.
Cleaning and Purifying Mercury. Thomas P. Bennett. March: 109.
Criteria for Sponsored Teaching Aids in Science Education. Samuel Schenberg. October: 277.
Culture Slides by the Week. Richard F. Thaw. September: 245.
Demonstration of Enzyme Activity (Laboratory Exercises for the Life Sciences). Robert E. Greenfield. May: 190.
Determining the Frequency of a Vibrating String. Harry E. Cressman. March: 107.
Development of High Level Science Talent. Sherman Ross, Victor H. Denenberg, and Randall M. Chambers. October: 279.
A Different Quiz Procedure. Robert G. Doty. April: 153.
Display Areas and the Group Technique. Theodore W. Munch. November: 334.
Earth Science Principles in the Secondary School. Loren T. Caldwell. April: 133.
Effective Learning Through Science Investigations (Problem Solving in Science Teaching—A Symposium). Julian Greenlee. February: 15.
Endocrinology and the Effects of Hormones (Laboratory Exercises for the Life Sciences). Donald Spencer. May: 196.
Evaluation Sheet for a Student Science Project. Madeleine F. Coutant. May: 206.

Force Feeding Snakes. Thomas P. Bennett. November: 361.
Genetics a la Chinese Checkers. Edna L. Meadows. December: 422.
Genetics and Skin Grafting (Laboratory Exercises for the Life Sciences). Richmond T. Prehn. May: 195.
High School Chemistry: Keeping the Course Up To Date: A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.
High School Physics in Popular Dress. Carleton J. Lynde. November: 353.
A Holiday Matching Test. Robert Silber. November: 359.
How to Evaluate a Field Trip. Richard B. Fischer. November: 330.
An Improved Phase Change Demonstration. William R. Riley. April: 155.
Incorporating Cancer Information in the Secondary School Science Program. Israel Light. March: 93.
The Induction of Cancer by a Virus (Laboratory Exercises for the Life Sciences). W. Ray Bryan. March: 97.
It's Easier Than You Think! Peter Brem. April: 153.
Laboratory Exercises for the Life Sciences—A Series of Experiments, Demonstrations, and New Ideas.
The Use of Prepared Microscope Slides in the Teaching of Science. Ross C. MacCardle. March: 95.
The Induction of Cancer by a Virus. W. Ray Bryan. March: 97.
Representative Sources for Supplies. March: 99.
Radioactivity and Isotopic Tracer Studies. James C. Reid. April: 137.
Tissue Culture. Joseph Leighton. April: 139.
Techniques in Microscope Slide Preparation. Joseph M. Albrecht. April: 142.
Transplantation of Tumor Tissue. Dorothea Fitzgerald. April: 143.
Demonstration of Enzyme Activity. Robert E. Greenfield. May: 190.
Chromatography and Paper Electrophoresis. Carl G. Baker. May: 192.
Genetics and Skin Grafting. Richmond T. Prehn. May: 195.
Endocrinology and the Effects of Hormones. Donald Spencer. May: 196.
Laboratory Savings. David D. Porter. September: 243.
Longitude, Time, and Date. Leland L. Wilson. November: 357.
Magnetic Lines of Force. Nicholas M. Babyock. May: 205.
A New Method of Presenting the Gas Laws. Ray A. Woodriff and Marjory Goering. December: 392.
Pets, Parents, and Children. Robert L. Gantert. May: 188.
Polio Education: A Live Study for the Classroom. Janet M. Lowe. September: 239.
Pressure Variation and the Radiosonde. M. Ira Dubins. December: 420.
A Problem-Solving Approach in Biology (Problem Solving in Science Teaching — A Symposium). Irene Hollenbeck. February: 17.
Problem Solving in High School Physical Science (Problem Solving in Science Teaching—A Symposium). Harold E. Ward. February: 19.
Radioactivity and Isotopic Tracer Studies (Laboratory Exercises for the Life Sciences). James C. Reid. April: 137.
Representative Sources for Supplies (Laboratory Exercises for the Life Sciences). March: 99.
A Saturating Core Reactor for the Physics Laboratory. Frederick B. Eiseman, Jr. October: 282.
Science Crossword Puzzle. Melva M. Haney. May: 207.
Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.
Science-Related Mathematics Exercises: A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.
A Simple Model for the Structure of the Atom. Wesley W. Wendlandt. December: 422.
Student Reaction to Laboratory Work in Physical Science. Glenn F. Powers. May: 205.
Teaching Chemistry the Easy Way. Paul Westmeyer. December: 397.
Teaching Radio in High School Physics. Frederick B. Eiseman, Jr. December: 388.
Techniques in Microscope Slide Preparation (Laboratory Exercises for the Life Sciences). Joseph M. Albrecht. April: 142.
Thrilling New Advances in Visual Aids. Allan B. Burdick. September: 237.
Tissue Culture (Laboratory Exercises for the Life Sciences). Joseph Leighton. April: 139.
Transplantation of Tumor Tissue (Laboratory Exercises for the Life Sciences). Dorothea Fitzgerald. April: 143.
The Use of Prepared Microscope Slides in the Teaching of Science (Laboratory Exercises for the Life Sciences). Ross C. MacCardle. March: 95.
What Happens If—? Cornelius Denslow. December: 385.
Winter Nature Study. Robert R. Schmatz. December: 387.

Investigations, Research, and Fact-Finding Studies

A Century of High-School Science. Sidney Rosen. November: 321.
The Development of Scientific Laboratories. Aaron J. Ihde. November: 325.
Is the Science Teacher Shortage a Curriculum Factor? Ray C. Maul. May: 181.

National Enrollments in High School Science. Kenneth E. Brown. March: 89.
Report of the New York City Advisory Committee on Science Manpower. December: 394.
Retention of Learnings in High School Chemistry. John R. Smeltz. October: 285.
Trends and Issues in Junior High School Level Science. Donald W. Stotler. September: 233.
Trends in Junior High General Science. Keith Smith. March: 86.

NSTA Activities

Apparatus and Equipment Committee. December: 426.
Atlanta Meeting. February: 57.
Biology Committee. October: 297.
Boston NEA Conference. April: 157.
Business-Industry Section. September: 249.
Data Wanted (Science teacher lists, student enrollments). March: 103.
Executive Committee Actions. February: 57.
Field Activities. March: 103.
Grant for Physics Study. May: 209.
If You'd Like to Work Overseas. October: 268.
Life Members. May: 209. December: 393, 425.
Magazine Advisory Board Election. February: 57.
Meetings and Conventions Schedule (Looking Forward). December: 425.
Membership Gains. April: 157. October: 297.
Moving Day at NSTA. March: 103.
National Convention, 1956. February: 59. March: 100.
National Convention, 1957. September: 246. November: 365. December: 425.
National Convention, 1958. December: 425.
New Publications. April: 157.
New York City Meeting. November: 363.
Nominating Committee Report. February: 58.
Nominees for Officers and Directors, 1956-57. February: 47.
Nominee Suggestions Wanted. November: 363.
Northeastern Conference. November: 363.
NSTA on President's Committee. May: 208.
Officers and Directors, 1956-57. May: 209. September: 247.
Oregon Meeting. April: 157. May: 208. September: 247.
Science Education in the Centennial of the Organized Teaching Profession. September: 241.
The Science Teacher. December: 426.
Science Teacher Achievement Recognition (STAR) Program. February: 55. March: Insert. May: 203. September: 251. October: 297. November: 363. December: 425.
Southwest Regional Conference. September: 249.
Staff Changes. September: 249. October: 297.
Tomorrow's Scientists. November: 363.

Science Clubs, Fairs, and Exhibits

A Keyhole Look at Science Fairs. Virgil C. Dollahon, Arthur Houston, Flora Kahme, and Herbert McMillen. November: 328.

Science Course Content, Organization, and Curriculum

The ABC's of Bacteriology. Martha R. Sheek. December: 398.
College Teachers Look at High School Science. Richard M. Sutton and William T. Lippincott. May: 184.
Earth Science Principles in the Secondary School. Loren T. Caldwell. April: 133.
High School Physics in Popular Dress. Carleton J. Lynde. November: 353.
Incorporating Cancer Information in the Secondary School Science Program. Israel Light. March: 93.
Polio Education: A Live Study for the Classroom. Janet M. Lowe. September: 239.
Student Reaction to Laboratory Work in Physical Science. Glenn F. Powers. May: 205.
Teaching Chemistry the Easy Way. Paul Westmeyer. December: 397.
Trends and Issues in Junior High School Level Science. Donald W. Stotler. September: 233.
Trends in Junior High General Science. Keith Smith. March: 86.

Tests and Evaluation of Outcome

Do Their Scientific Methods Show? (Problem Solving in Science Teaching—A Symposium). Oreon Keeslar. February: 21.
How to Evaluate a Field Trip. Richard B. Fischer. November: 330.
The Philosophy of Test Construction in Science. George W. Angell, Jr. May: 175.
